

When it comes to picking a name it can be daunting, time consuming, and discouraging.

If you find a name you love but it's taken; Don't quit yet. You can always try to add one of these at the end of the handle or URL Domain:

Graze, co, LLC, CA (or your state), USA (or your country initials), City, or The

Keep in mind if your business is "Amazing\_Graze" and there is a local company named "Amazing\_Grazing" that could get confusing for your clients. The last thing you want to happen is having your business be tagged or mistaken for another. (I want you to get all the clients and credit you deserve.)

So with that being said below are some buzz words, unique words, and names for you to mix/match and see what's available. Some of these may be taken but try to get creative with the ones you like. Example if you like the words "Sage and Olive" but it is taken... Try playing around with numbers, colors, textures, fruits, etc. You could do "Sage & the little olive branch"- Which is unique, and long. But sometimes the long names are what stick. ;) - OR an option could be "Sage Grazing Co" or "Summer Sage" etc etc.

Have fun!
